Presidents' Message

Recognising our uniqueness and specialities is to respect ourselves and others too. To have respect for oneself based on other people's opinion or situational achievements, is to have respect temporarily. True respect for the self is based on the recognition of the fact that every individual is special with its own set of unique capabilities. This understanding enables us to see our own uniqueness without being influenced by others or comparing ourselves with them.

When we recognise and appreciate our own uniqueness and respect ourselves, we are able to shed our ego or feelings of inferiority. Then we can recognise others' uniqueness and respect them for it, and in turn win their love and respect. This ensures harmony and happiness in our life and relations.

Instead of trying to oppose a person who displays negative qualities, we need to oppose the negativity itself. The one who knows the art of doing this, will never encourage the weakness in the other person but will provide all help to face and eradicate it fully. Since we are able to focus on the weaknesses we intend to remove, we free ourselves from negative feelings of dislike and hatred. These would be a genuine feeling of love, which in turn provides the right environment for the other person's growth. Let this idea be a simple pointer for a new YOU in the new year. May Lord Sri Rama bless us to imbibe this idea.

I am happy to inform you that, we have purchased a piece of land along with other persons/organisations of Vysya community. We will get an office space of 1000 square feet build up area on the R V Road very near to our office. An appeal is made requesting all our members, donors and well-wishers to contribute liberally for this project.

A technical seminar is proposed in the month of March, 2024, I request the engineering professionals and students to make use of it. I look forward for your co-operation to take the flag of AVOPA fly high in the year 2024.
